

This listing of claims will replace all prior versions, and listings of claim in the application:

**Listing of Claims:**

1-5 (canceled).

6 (new). An apparatus for separating coarse grain and fine grain, which comprises

- (a) a screen comprised of at least two rows of adjacently arranged screen bars sloping downwardly in a conveying direction of the coarse grain, the rows of screen bars being disposed successively in the conveying direction, and
- (b) a bar-shaped support for each row of the screen bars, the bar-shaped support being held in a frame in a manner torsionally resilient about a longitudinal axis extending transversely to the screen bars,
  - (1) the screen bars having ends encompassing the bar-shaped support by at least 90° and held on the support by a profile receiving the screen bar ends between the support and the profile.

7 (new). The apparatus of claim 6, wherein the bar-shaped supports are arranged in steps successively behind each other in the conveying direction.

8 (new). The apparatus of claim 6, comprising two conveyor belts defining a transfer region therebetween, the frame being arranged in the transfer region and being detachably connected to a belt head of at least one of the conveyor belts.

9 (new). The apparatus of claim 8, wherein the screens, the bar-shaped supports and the frame form a modular unit.

10 (new). The apparatus of claim 6, further comprising a transport frame attached to the frame.
